*¡Agua es Vida: Do your Part!*

**WATER BANKRUPTCY:  
WE KNOW ENOUGH TO ACT!**

**May 21, 2026 6:30 PM to 8:00 PM**

Join us to learn from Brian Richter and Enrique Prunes, lead and co-authors of a landmark study documenting that more than half of all water consumed from the Rio Grande - Rio Bravo basin cannot be sustained. Their research makes it plain: our water accounts are overdrawn. Their message is that action is imperative if New Mexicans are to continue to enjoy life here. Their conclusions should motivate us to help build the political will to face our uncontrolled slide toward water bankruptcy. Real progress toward lasting water security becomes possible when those with the power to act choose to use it. Come ready to talk about what New Mexico can do — and what it will take to do it.
