

Call for Volunteers

Would you like to host a hands-on workshop to install a rainwater harvesting feature in your yard?

The Silver Median project team is looking for a homeowner to host a hands-on rainwater harvesting workshop in Nob Hill. If your home is selected, certified water harvesters will help you complete a site assessment and create a design for your yard. Instructors will then lead a group of volunteers from the neighborhood to build rainwater harvesting landscape features in your yard to support you existing landscape, as well as additional trees and other native plants that will be provided by the project.

Requirements

- Own a single or multi-family residence in Nob Hill
- Have current homeowner's insurance.
- Willing to engage with the project team to help plan, design, and install the project.
- Willing to host up to 20 volunteers to install a rainwater harvesting basin in your yard.
- Willing to provide bathroom access during the workshop

Apply online by Sept 1!
