

YOU ARE INVITED TO A:

COLLABORATIVE DESIGN MEETING FOR THE SILVER AVE. MEDIAN GSI PROJECT

Join us for a community meeting to contribute your ideas to the design of the green stormwater infrastructure (GSI) project that is planned at the dirt median on Silver Ave. SE and Solano Dr. SE. This event is open to Nob Hill neighborhood residents, City on a Hill Church members, and those who have volunteered to support long term maintenance of the project site.

GSI, also known as rainwater harvesting, is a nature-based solution for our arid climate that can provide many benefits to both people and nature.
