

YOU ARE INVITED TO:

# FINAL DESIGN REVIEW FOR SILVER AVE. MEDIAN COMMUNITY GSI PROJECT

Join us for a community meeting to review the final design for the **green stormwater infrastructure (GSI)** project that is planned at the dirt median on Silver Ave. SE and Solano Dr. SE. Participants will have the opportunity to provide feed back on the design, ask questions, and learn more about next steps, project timelines, and how to get involved in caring for the site. Participants can also access educational resources and sign up for a hands-on rainwater harvesting workshop in spring 2026. Nob Hill neighborhood residents, City on a Hill Church members, and those who have volunteered to support long term maintenance of the project site are encouraged to attend.

GSI, also known as rainwater harvesting, is a nature-based solution for our arid climate that provides multiple benefits to both people and nature.

**THURSDAY JANUARY 22 6-7PM**

**CITY ON A HILL CHURCH (3715 SILVER AVE. SE)**

**LIGHT REFRESHMENTS PROVIDED**
