

## Using Zoom during FOSM Meeting

- If new to Zoom, Google “How to install Zoom on...” and follow instructions.
- Make sure your microphone and video are disabled.
- If using a computer, select Speaker view so you see the meeting speakers rather than others on Zoom.
- If using mobile device, Speaker view is the default.
- Open participants window to edit name so we know who you really are (rather than “iPhone” or indecipherable email address).
- Use Chat to ask questions or make comments.
  - Let us know of video or sound problems!!

**Remember, this is an experiment  
that may not work.**
