## **Cibola National Forest Implements Prescribed Fire Operations**

### **Sandia Ranger District - Sulphur Unit Piles**

#### ***Favorable weather conditions in place for hazardous fuels reduction work***

**ALBUQUERQUE, NM – December 9, 2025** – The Cibola National Forest & National Grasslands (NF & NGs) has implemented prescribed fire operations today on piles within the Sulphur Unit on the Sandia Ranger District. This multi-day operation will continue as weather conditions allow and pending all required approvals.

Fire managers are taking advantage of recent precipitation, snow covered ground, cooler temperatures, and relative humidity recoveries that create suitable conditions for burning piled slash and woody debris from earlier forest restoration work. We use prescribed fire to reduce overgrown vegetation, this helps to protect local communities, infrastructure and natural resources from extreme, high-severity wildfires.

Sandia Ranger District Prescribed Fire planned:

- Sulphur Unit Prescribed Pile Burn: 18 acres of piles within the Sulphur unit in the Sandia Piles Rx plan. The pile burn area is in the Sandia east mountains, north of I-40, west of NM-14 and south of NM-536. Smoke may be visible in the surrounding areas of Albuquerque, Tijeras, Edgewood and Moriarty, NM. **Map attached.**

This area may be closed to the public for several days during burn operations for public safety. Watch for warning signs along roads near all prescribed fire areas during burns.

Residents may experience smoke during the prescribed burn. For more detailed information about air quality, go to [AirNow](#) online or download the app. Smoke is expected to lift during the day, however, cooler overnight temperatures may cause smoke to settle into low-lying areas surrounding the burn location. When driving, slow down and turn on your headlights when you encounter smoke on the road.

Stay informed about scheduled prescribed fires through [InciWeb](#), [New Mexico Fire Information](#) and on the [Cibola NF & NGs website](#), [Cibola Facebook](#) and [Cibola X](#) sites.

About the Forest Service: The USDA Forest Service has for more than 100 years brought people and communities together to answer the call of conservation. Grounded in world-class science and technology– and rooted in communities–the Forest Service connects people to nature and to each other. The Forest Service cares for shared natural resources in ways that promote lasting economic, ecological, and social vitality. The agency manages 193 million acres of public land, provides assistance to state and private landowners, maintains the largest wildland fire and forestry research organizations in the world. The Forest Service also has either a direct or indirect role in stewardship of about 900 million forested acres within the U.S., of which over 130 million acres are urban forests where most Americans live.
